**Ködispace 4SG**

**Thermoplastic Spacer (Warm Edge System)**

- Warm Edge System for the manufacture of insulating glass, especially for Structural Glazing
- Very low water vapour and gas permeability
- Improved temperature resistance in the insulating glass
- Optimised adhesion to glass and the silicone-secondary sealant due to chemical bonding
- Fast wet out to glass after application
- Reduction of condensation in the edge area
- High productivity due to fully automated application

*Ködispace 4SG* consists of a thermoplastic rubber with integrated desiccant for dehydrating the space between the panes. *Ködispace 4SG* is applied with a suitable applicator onto the glass and completely replaces conventional metal or plastic spacer, desiccant and primary seal. The outer sealing is still to be made with the proven two-component sealant for the manufacture of insulating glass *GD 116* (PSR), *GD 920* (Silicone) or *Ködiglaze S* (Silicone).

**Processing**

**Preparation**

The application surface must be dry, clean and free from dust and grease. For cleaning the panes suitable glass washing machines must be used.

**Bonding**

*Ködispace 4SG* is supplied in a „ready-to-use“-state, but must be heated up to +110 °C to +140 °C. Further processing is made with a TPS-applicator.

Processing

Follow the detailed application instructions for Ködispace 4SG, which are available on request.

*Ködispace 4SG* was developed for the production of insulating glass for use in the construction industry. For other applications please contact our technical service department.
**Special Notes**

**Storage**

Store in unopened drums. Do not exceed +40°C. Protect from humidity and direct sunlight. Do not store outside.

In the unopened container **Ködispace 4SG** can be stored for at least 12 months.

---

**Safety**

Prior to application it is highly recommended to read our Safety Data Sheets containing health, safe handling, storage, disposal of chemical products and other safety related data.

Please also refer to the safety recommendations on the label before using the product.

Especially the directions of the Dangerous Substance Regulation should be carefully observed.

**Packaging**

Drums of 220 kg

---

For safety related data please refer to the safety data sheet!
